

Team 25 Team Charter

Team Members	1. Ragini Pawaiya(raginipawaiya5@gmail.com) 2. Shivanand Tiwari (0126CD231145@oriental.ac.in) 3. Kariuki Sophia (kariukisophia52@gmail.com) 4. Israel Georgewill(israelgeorgewill@gmail.com) 5. Esther Munyambu(esthermunyambu2004@gmail.com) 6. chinomso Akumah(Essy4God@gmail.com) 7. Shivpratik Chaudhari(shivpratikc@gmail.com) ...
Team Lead	Ragini Pawaiya (raginipawaiya5@gmail.com)
Team Members Roles and Responsibilities	Team Members Roles and Responsibilities Saint Louis University (SLU) — Office of International Services (OIS) Individual Company Contacts – Client, Role(s) in Company Ragini Pawaiya (raginipawaiya5@gmail.com) - Team Lead, represents team meetings, coordinates team activities, assigns tasks, and ensures project objectives are achieved. Kariuki Sophia (kariukisophia52@gmail.com) - Project Manager, provides guidance and support to team members, monitors project progress, and ensures that project activities remain on track. Shivanand Tiwari (0126cd231145@oriental.ac.in) - Project Scribe, responsible for taking meeting minutes, documenting discussions, maintaining project records, and assisting the Team Lead with communication. Israel Georgewill (israelgeorgewill@gmail.com) - Project Lead, responsible for monitoring task completion, tracking deadlines, and ensuring that project deliverables are completed on time. Esther Munyambu (esthermunyambu2004@gmail.com) - Data Quality Analyst, responsible for reviewing datasets, validating data accuracy, identifying data quality issues, and supporting data cleaning activities. Chinomso Akumah (Essy4God@gmail.com) - Research and Documentation Coordinator, responsible for gathering project-related information,

	supporting report preparation, maintaining documentation, and assisting with presentation materials. Shivpratik Chaudhari (shivpratkc@gmail.com) - Database and Dashboard Coordinator, responsible for supporting database management, data integration, dashboard development, and technical implementation tasks.
Mission, Vision Objectives & Core Values	<i>Mission</i> : To support Saint Louis University's Office of International Services by cleaning, integrating, and analysing international student data so that staff can confidently track I-901 fee payments, I-20 issuance, and deposit status without manual guesswork. <i>Vision Objectives</i> : Success to us means that by the end of this project, an OIS staff member can open a dashboard, see exactly which students are missing their SEVIS fee payment or still waiting on their I-20, and act on it the same day. We want our work to actually get used after we hand it over — not just sit in a report. As a team, we want to stay honest with each other about progress, divide work fairly, and not leave everything to one person at the last minute.
	<i>Core Values:</i> Integrity — we document what we actually did, including mistakes and limitations, as seen in our Week 1 report where we flagged every data gap honestly. Accountability — each member owns their deliverable for the week. If something is delayed, we say so early. Discipline — we stick to ISO date formats, clean naming conventions, and structured reporting because shortcuts create problems downstream. Respect — every team member's input gets heard in meetings, regardless of technical background. Innovation — we look for the smarter fix, like when we caught the snapshot duplication pattern in Connect instead of just accepting the inflated row count.

Internal Checks, Balances, and Reviews

Our team will work together to complete all project tasks on time and maintain the quality of our work. As the Team Leader, I will coordinate team activities, track progress, communicate with the sponsor, and ensure that deadlines are met.

We will hold a team meeting once every week to discuss completed work, review progress, solve any issues, and plan the next steps. Team members are expected to actively participate in meetings and share updates on their assigned tasks.

Before submitting any report or deliverable, the work will be checked by another team member to identify mistakes, missing information, or areas that need improvement. Necessary corrections will be made before the final submission.

SMART Goals

- **Specific:** Complete all weekly project tasks and deliverables.
- **Measurable:** Monitor progress through completed reports, data analysis tasks, and project milestones.
- **Achievable:** Assign work according to each team member's skills and responsibilities.
- **Realistic:** Set practical goals and deadlines that can be achieved within the project timeline.
- **Time-Based:** Finish all assigned tasks before the scheduled submission dates.

Operations

Assignments: Tasks will be divided among team members based on project requirements and individual strengths.

Meetings: Weekly team meetings will be conducted to review progress and discuss upcoming work.

Communication Guidelines: Team members should respond to messages within 24 hours and inform the Team Leader if they face any challenges or delays.

Status Updates: Every team member will provide regular updates on their work during meetings.

	Deadlines: All tasks should be completed before the internal review date so that sufficient time is available for final checking and submission.
Operations: • Assignments • Meetings • Communication Guidelines • Status Updates • Deadlines	Assignments: Team members will work on data cleaning, data validation, database management, documentation, data analysis, and dashboard development according to their assigned responsibilities. Tasks will be distributed by the Team Leader based on project requirements and team members' skills. Meetings: The team will meet once every week through Microsoft Teams or Google Meet to discuss progress, review completed work, resolve issues, and plan upcoming tasks. Additional meetings will be scheduled when required. Communication Guidelines: The Team Leader will serve as the main point of contact with the sponsor. Team members are expected to communicate respectfully, actively participate in discussions, and respond to messages within 24 hours. WhatsApp and Microsoft Teams will be used for regular communication and updates. Status Updates: Each team member will provide weekly updates on completed tasks, current progress, and any challenges faced. Progress will be reviewed during team meetings before submission of weekly deliverables. Deadlines: All assigned tasks must be completed before the internal review date. Weekly reports and project deliverables will be submitted according to the timeline provided by Excelerate and the project sponsor.

Exploratory Data Analysis & Compliance Insight Report

Executive Summary

This report presents an exploratory analysis of applicant eligibility, enrollment document completion, and government fee payment compliance. The objective is to identify patterns, disparities, and early indicators of compliance risk across applicant groups, regions, and intake periods. Findings from this analysis can support proactive intervention strategies and improve compliance monitoring processes.

1. Eligibility Analysis

Overview

The eligibility analysis examined the distribution of applicant eligibility statuses and assessed variations across key demographic, geographic, and intake-level categories.

Distribution Analysis

Figure 1: Eligibility Status Distribution based on Payment Completion

Description: The chart above shows the measure of payment status by 1_901 transaction type. Where accepted payment rises higher than cancelled payment.

Figure 2: Eligibility Status Distribution based on I-SO status

Description: The Pie chart reveals the status of eligibility by I_20 status. The bigger region (yes) 65.32% and the smaller region (No) 34.68%.

Summary Statistics

Metric	Value
Total Applicants	3524
Eligible Applicants	1602
Involved Countries	66
Not Eligible	53
Eligibility Rate	45%

Comparative Insights

- Eligibility rates varied across applicant groups and intake periods.
- Certain regions demonstrated higher eligibility approval rates than others.
- Conditional eligibility was concentrated within specific applicant segments, suggesting documentation or verification challenges.

Key Observations

- The majority of applicants met baseline eligibility requirements.
- A small proportion of applicants required additional verification before approval.
- Regional differences suggest potential variations in applicant preparedness or application quality.
- Eligibility outcomes may influence downstream compliance activities.

2. Enrollment Document and Eligibility Analysis

Overview

This section evaluates enrollment document completion rates and examines how document compliance relates to applicant eligibility outcomes.

Completion Rate Analysis

Figure 2: Enrollment Document Completion Rate

Description: The graph shows the completion rate as 45%.

Intake-Level Comparison

Figure 3: Document Completion by Intake Period

Description: This shows the gradual increase in payment completion over the past years. 2025 is the most impressive.

Regional Breakdown

Figure 4: Regional Enrollment Document Completion

Description: The graph above shows the enrollment completion of various regions. The highest set to be India with 1055 completed transaction based on 1_09 transaction

Key Findings

- Completion rates differed significantly across intake periods.
- Some regions demonstrated consistently stronger document submission performance.
- Applicants with complete documentation were substantially more likely to achieve eligible status.
- Missing documentation frequently aligned with delayed processing timelines.

Identified Patterns

- Early document submission correlated with higher compliance rates.
- Regions with lower completion rates showed increased administrative follow-up requirements.
- Certain document categories accounted for most incomplete applications.
- Intake periods with larger applicant volumes experienced slightly lower completion rates.

3. Government Fee Payment Analysis

Overview

Government fee payment compliance was analyzed to identify completion patterns, timing behaviors, and potential compliance risks.

Completion Status Distribution

Figure 5: Government Fee Payment Status Distribution

Description: This shows government fund distribution of funds through student loan which helped in completion of 364 payment completion.

Timing Analysis

Figure 6: Fee Payment Timing Distribution

Description: The line graph shows the distribution of payment with yearly timing. 2025 has an impressive rise in payment completion.

Regional and Intake Comparisons

Figure 7: Regional Fee Payment Compliance

Description: This show that India has a high rate of compliance to payment than others.

Findings

- Most applicants completed government fee payments successfully.
- Payment timing varied significantly across regions and intake periods.
- Delayed payment completion was associated with increased compliance risk.
- Certain intakes experienced higher rates of outstanding payments.

Early Risk Clusters

The analysis identified several early indicators of potential compliance concerns:

- Applicants with incomplete documentation and unpaid fees.
- Late-stage fee payments occurring near compliance deadlines.
- Regions exhibiting consistently lower payment completion rates.
- Intake groups with elevated proportions of outstanding government fees.

These clusters may require additional monitoring and proactive intervention.

4. Summary of Key Findings

Major Insights Discovered

- Eligibility outcomes were strongly associated with document completion status.
- Applicants submitting complete documentation early demonstrated higher overall compliance rates.
- Government fee payment compliance remained high overall but varied by intake and region.
- Early process completion consistently predicted stronger compliance outcomes.

Notable Disparities

- Regional differences existed in both document completion and fee payment rates.
- Some intake periods exhibited lower compliance performance than others.
- Specific applicant segments experienced higher rates of incomplete submissions.

Early Indicators of Compliance Risk

The following factors emerged as potential predictors of future compliance challenges:

1. Missing enrollment documentation.
2. Delayed document submission.
3. Outstanding government fee payments.
4. Repeated follow-up requirements.
5. Combined documentation and payment deficiencies.

Areas Requiring Further Monitoring

- Regions with below-average compliance rates.
- Intake cohorts with elevated outstanding payment levels.
- Applicants with incomplete enrollment documentation.
- Processing delays associated with eligibility verification.
- Longitudinal trends in compliance performance across future intake periods.

Conclusion

The exploratory analysis revealed meaningful relationships between eligibility status, document completion, and government fee payment compliance. Early completion of enrollment requirements consistently aligned with improved compliance outcomes. The identified risk indicators can support targeted interventions, improve resource allocation, and strengthen overall compliance monitoring efforts.

Future analyses should incorporate longitudinal tracking, predictive modeling, and ongoing monitoring of high-risk applicant groups to further enhance compliance management strategies.
